

# FiberFin LC Connector Field Termination Instruction's

## *Needed supplies to make a POF cable*

- 1) LC Duplex POF connector
- 2) Duplex Zipcord POF Cable
- 3) LC Ultra Low Loss cutter
- 4) LC Duplex Crimp Tool

## *Work instructions are designed to work with the LC POF Connector Part # FF-LC1000*

- 1.If necessary, use the tool to cut the plastic optical fiber from the cable spool or just finishing the bare cable in slots # 1 as shown in (Figure 1).
- 2.Split the cable jacket as shown in Figure 2 Insert cable into slot and push down lever, (Figure 2 & 3) remove and separate the zipcord approximately 2"
- 3.slide the slit POF cable into the strip hole, Item 4 in Figure 1. You want to strip at least 1" of jacket off the cable.
- 4.To strip the fiber, insert the fiber into the tool and close the tool. Keep the tool closed then rotate at least 1 ½ turns (Figure 4) Then pull outward to remove the jacket. (Figure 5)
- 5.Note: you can only use one hole at a time, there are two holes for wear of the blade

# FiberFin LC Connector Field Termination Instruction

*Work instructions are designed to work with the LC PDF Connector Part # FF-LC1000 (Continued)*

1. Line up the second fiber to the seam of the tool as shown in Figure 5 and then remove that jacket as well.
2. After stripping, the fibers should appear as they do in Figure 6.
3. Slide the fiber into the LC connector housing so it bottoms out in the connector (Figure 7).
4. To secure the cable within the connector use the crimp tool FF-CRMP-LC (Item 4) on the metal crimp ring.
5. Note: Detail instructions about the LC crimp tool comes with the tool or on the FiberFin.com website.
6. The Crimped LC Connector assembly is now ready to be finished, Insert connector into the holes in the front of the tool (Figure 9)
7. The connector should be seated flush as shown in (Figure 8). Push the connector while cutting to insure proper cut position.
8. Cleave off the excess fiber using the tool (Figure 9). There are 3 sets (6 holes) of locating holes. Each set is good for a maximum of 10 cuts.
9. The final assembly should appear as shown in Figure 12.
